SHREEPAD SHARNARTHI

Pune, Maharashtra | +91 7841808484 | sharnarthim@gmail.com | linkedin.com/in/shreepadsharnarthi | github.com/Shreepad-Sharnarthi

PROFESSIONAL SUMMARY

Python Developer with hands-on production experience at Markytics.AI in backend development, REST API design, Django ORM, PostgreSQL, Docker, and monitoring infrastructure. Contributed to 68 tracked production tasks across two enterprise applications. Strong foundation in Django, FastAPI, Flask, SQL, distributed systems (Redis, RabbitMQ), and observability (Prometheus, VictoriaMetrics). Research co-author at IEEE ICEFEET 2026. Seeking a Python Developer role to build scalable, production-quality backend systems.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Backend Frameworks:** Django, Django REST Framework (DRF), FastAPI, Flask
- **Database & ORM:** PostgreSQL, Microsoft SQL Server, MySQL, SQLite, Django ORM, SQLAlchemy, Query Optimisation, Database Design
- **DevOps & Infrastructure:** Docker, Docker Compose, Git, GitLab, GitHub, Nginx, Linux, CI/CD Concepts
- **Distributed Systems:** Redis, RabbitMQ, Celery
- **Monitoring & Observability:** Prometheus, VictoriaMetrics, PromQL, MetricsQL, Alerting, Telemetry, Metrics Exporters
- **Web Technologies:** HTML5, CSS3, JavaScript, jQuery, JSON, REST APIs
- **Testing & Tools:** Unit Testing, Integration Testing, Regression Testing, Debugging, Root Cause Analysis, Postman, VS Code
- **Data & ML:** Pandas, NumPy, Scikit-learn, Data Preprocessing, Feature Engineering, Random Forest, MobileNetV2

EXPERIENCE

Python Django Developer Intern | Markytics.AI *Aug 2026 – Present*
Pune, Maharashtra

- Built and maintained backend features using **Python, Django, Django ORM, PostgreSQL, SQLAlchemy 2.0,** and REST APIs across multiple production Django applications.
- Resolved production defects in Django views, ORM queries, forms, workflow logic, data-mapping, Excel report generation, and email notification dispatch.
- Implemented **Prometheus-compatible metrics endpoint** with bearer-token and API-key authentication; validated HTTP 401 responses for unauthenticated/invalid requests.
- Built and deployed **Asterisk taskprocessor backlog alerting** with threshold-based Prometheus alert evaluation and end-to-end monitoring validation.
- Worked with **RabbitMQ, Redis, Docker, VictoriaMetrics, Nginx,** SSL/TLS, and automated testing in a production deployment workflow using Git/GitLab and merge requests.

Data Analytics & Python Intern | QSpiders CampusConnect *Feb 2026 – Jul 2026*
Pune, Maharashtra

- Developed Django web applications using MVT architecture, authentication, CRUD operations, REST APIs, and MySQL.
- Analysed 10,000+ records using Python, Pandas, NumPy, and SQL; built dashboards with Power BI, Matplotlib, and Seaborn.
- Wrote optimised SQL queries with joins, subqueries, and aggregations for backend data reporting workflows.

PROFESSIONAL PROJECTS — MARKYTICS.AI

Packaging Quality & Production Management System
Python, Django, Django ORM, Microsoft SQL Server, HTML, JavaScript, jQuery, Git/GitLab

- Maintained and enhanced a production Django application supporting packaging quality-management and production workflows across multiple departmental modules.
- Corrected sleeve-history retrieval logic (`base_id` / `sleeve_size`), fixed SumoSelect frontend behaviour, and resolved data inconsistencies in quality-related modules.
- Fixed Excel report formatting loss beyond 220 rows in the Weight of Plies report; validated through targeted regression testing.

Centralized Calling & Telemetry Monitoring Platform
Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, Redis, RabbitMQ, Celery, Prometheus, Git/GitLab

- Contributed to backend reporting, monitoring, and reliability improvements for a centralised enterprise telephony platform.
- Implemented threshold-based Asterisk taskprocessor backlog alerting; strengthened `/metrics` bearer-token authentication with full validation coverage; investigated call-reporting data relationships (call attempts, SBC attribution, SIP trunks, locations) for accurate reporting.

PROJECTS

HR Analytics & Employee Management System | *Python, Django, MySQL, Django ORM, Chart.js, Git* *GitHub*

- Built a full-stack HR system using Django MVT and MySQL with modules for Employee, Department, Attendance, Leave, Payroll, Performance, Recruitment, and Dashboard.
- Implemented JWT authentication, role-based access control, and CRUD operations via optimised Django ORM queries across a normalised relational database.
- Designed an analytics dashboard with HR KPIs and interactive Chart.js visualisations.

AI-Powered Precision Agriculture Platform — Egret | *Python, Flask, Pandas, NumPy, Gemini API* *GitHub*

- Built a Flask app for AI-powered crop recommendations via Gemini API; built automated preprocessing and feature-engineering pipelines using Pandas and NumPy.

AI Diagnostic System | *Python, Scikit-learn, Random Forest, MobileNetV2*

- Built an end-to-end ML diagnostic pipeline using Random Forest and MobileNetV2; evaluated with accuracy, precision, recall, and F1-score.

RESEARCH PUBLICATION

UMTL-FairCAM: Unifying Multi-Task Learning and Fairness-Aware Explainability for Equitable Dermatological Diagnosis

Co-Author | Accepted at **IEEE ICEFEET 2026, NIT Patna** | *Explainable AI, Deep Learning, Computer Vision, Fairness-Aware ML*

EDUCATION

Bachelor of Technology — Computer Science Engineering *2022 – 2026*

N. K. Orchid College of Engineering & Technology, Solapur *CGPA: 7.1 / 10*

CERTIFICATIONS

- SQL (Advanced) — HackerRank
- Software Engineer Intern Role Certification — HackerRank
- Machine Learning — NPTEL, IIT Madras
- Data Analytics Job Simulation — Deloitte / Forage
- Python Data Structures & Algorithms — LinkedIn Learning
- Adobe Generative AI — Coursera
